INDUS AVIATION ADOPTS AND DISTRIBUTES *LIGHT SPORT AVIATORS' MODEL CODE OF CONDUCT*

January 4, 2007 – Indus Aviation, of Dallas, Texas, manufacturer of Light Sport Aircraft and developer of the emerging Indian light aircraft infrastructure, announces the adoption and distribution of the *Light Sport Aviators' Model Code of Conduct* (Code of Conduct). The Code of Conduct presents broad guidance and recommendations to advance flight safety and responsible airmanship in the GA community. The Code of Conduct will be included with each new Indus aircraft delivery. “The Code of Conduct will be tremendously helpful to those of us involved in formulating a responsible and comprehensive aviation safety environment, particularly in the emerging aviation markets such as India and China. We welcome this document to assist us in creating the proper infrastructure for General Aviation,” said Ram Pattisapu, President of Indus Aviation and President of AOPA-India.

The Code of Conduct presents a vision of excellence in light sport aviation within its seven sections: (1) General Responsibilities of Aviators; (2) Passengers and People on the Surface; (3) Training and Proficiency; (4) Security; (5) Environmental Issues; (6) Use of Technology; and (7) Advancement and Promotion of GA. The Code of Conduct is a “living document,” periodically updated to reflect changes in aviation practices and the aviation environment. Its *Commentary*, available at <<http://www.secureav.com/Commentary-Index.pdf>>, addresses selected issues within the Code of Conduct to provide interpretive guidance and suggest effective ways to adopt it.

The Code of Conduct, together with supporting materials, is available as a free public service to the GA community at <<http://www.secureav.com>>. The Code of Conduct's Permanent Editorial Board is presented at <<http://www.secureav.com/PEB.pdf>>. For more information about the Code of Conduct, contact <PEB@secureav.com>.
